

Facts & Figures

Total sales > €2 billion

Including about 8% investment in R&D

Around 30 acquisitions in the last 10 years

More than 6,500 employees worldwide

4 divisions with independent brands

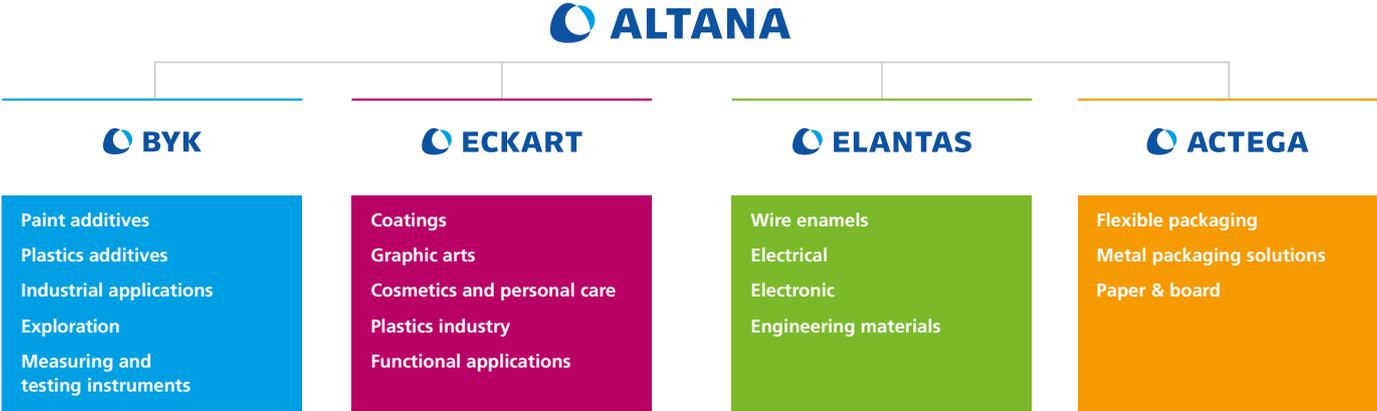

1 firmly anchored corporate culture

ALTANA – Global Leader in True Specialty Chemicals

ALTANA is a global leader in specialty chemicals. We offer innovative, environmentally compatible solutions for coating manufacturers, paint and plastics processors, the printing and packaging industries, the cosmetics sector, and the electrical and electronics industry. The product range includes additives, special coatings and adhesives, effect pigments, sealants and compounds, impregnating resins and varnishes, and testing and measuring instruments. The ALTANA Group has four divisions: BYK, ECKART, ELANTAS, and ACTEGA. All of these divisions occupy a leading position in their target markets with respect to quality, product solution expertise, innovation and service.

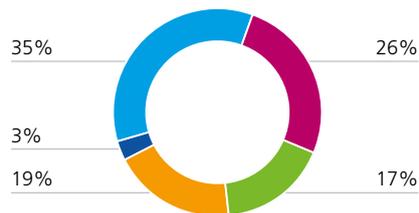

ALTANA's Corporate Structure

An important prerequisite for our success is the decentralized structure of the ALTANA Group with its four divisions and independent brands: BYK, ECKART, ELANTAS, and ACTEGA.

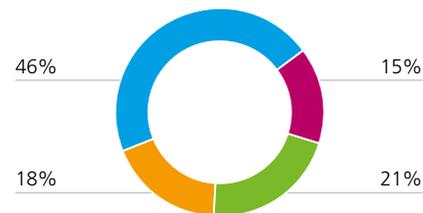

Headquartered in Wesel, Germany, the ALTANA Group has 48 production facilities and 65 service and research laboratories worldwide. Throughout the Group more than 6,500 people work to ensure the international success of ALTANA. In 2020, ALTANA achieved sales of over 2 billion euros. About 8 percent of sales are invested in research and development. ALTANA is one of the most successful and innovative chemical groups worldwide.

Employees by Division

	Dec. 2020	Dec. 2019	Δ %
BYK	2,307	2,347	-2

What We Stand for

We convince our customers through added value and create competitive advantages for them through our work. We want to enable our customers to always be one step ahead of their competitors. Regardless of which division, this is what you can expect of us:

- We provide innovative solutions based on our overall chemical, formulation and application expertise that make products of daily life better and more sustainable.
- Our solutions open up growth or savings potential for our customers and can change entire markets.
- As a result, we create value for our customers, employees, shareholder, and society as a whole.

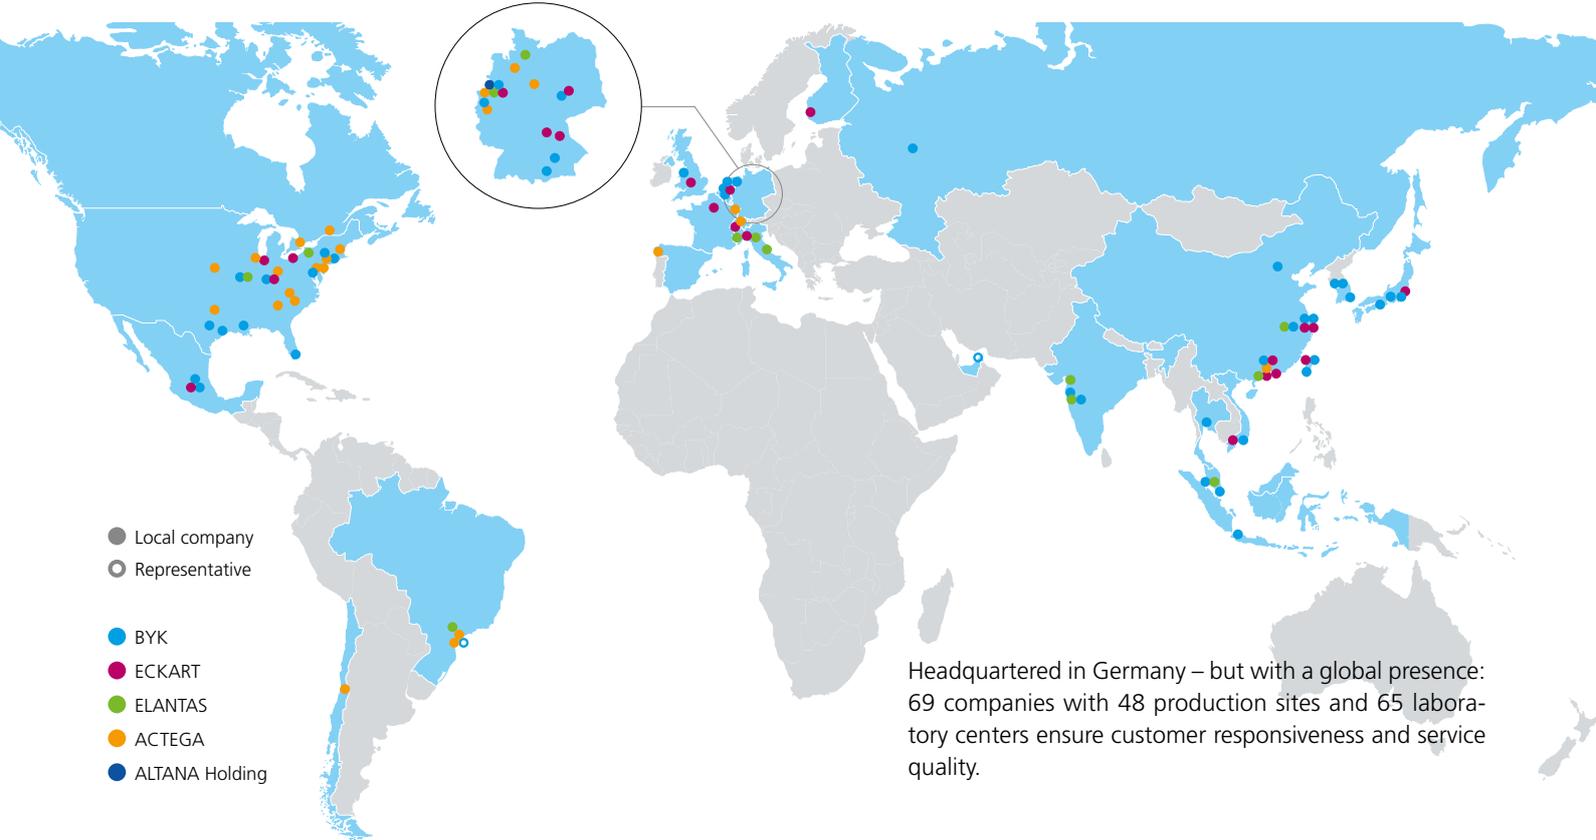

ALTANA's Areas of Activity: Solutions That Can Change Entire Markets

The ALTANA Group develops and produces a variety of products in the specialty chemicals sector which we use in everyday life without even knowing that ALTANA is involved. We provide the decisive plus for the business of our customers. Our coatings and sealants, paint and plastics additives, insulating materials, as well as our metallic and pearlescent pigments significantly improve our customers' end products and can change entire markets.

Additives from BYK, for example, allow replacement of solvents in paints and coatings with water. ACTEGA develops products such as PVC- and plasticizer-free sealing compounds for can lids. Insulating materials from ELANTAS are used in electric motors, digital cameras, and wind turbines, etc. They help ensure that product engineers can develop increasingly smaller and more efficient electronic devices, thus saving materials and energy. ECKART pigments provide metallic effects for cars. The division's pigments are also used in nail polishes and eye shadows.

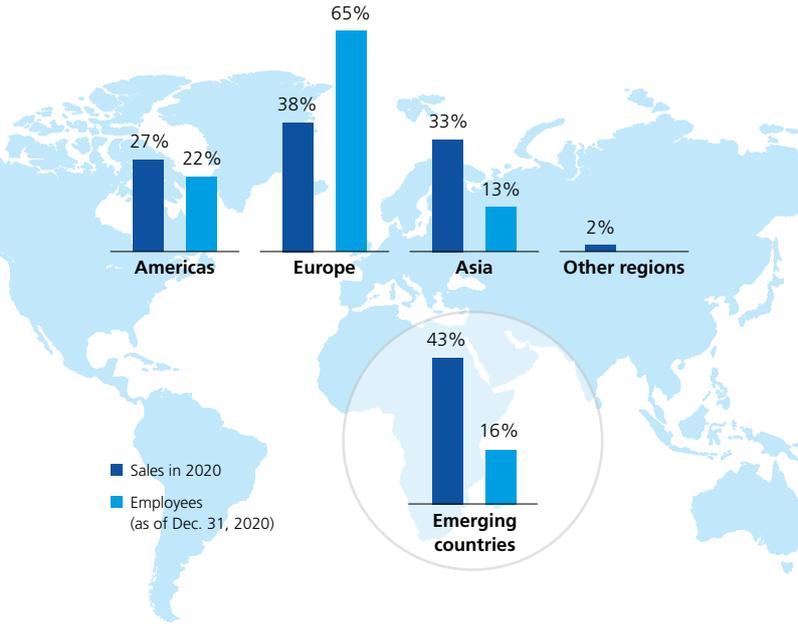

ALTANA Is Present All Over the World: Global Network – Local Presence

Headquartered in Germany – but with a global presence: 69 companies with 48 production sites and 65 laboratory centers ensure customer responsiveness and service quality.

Balanced Geographic Profile

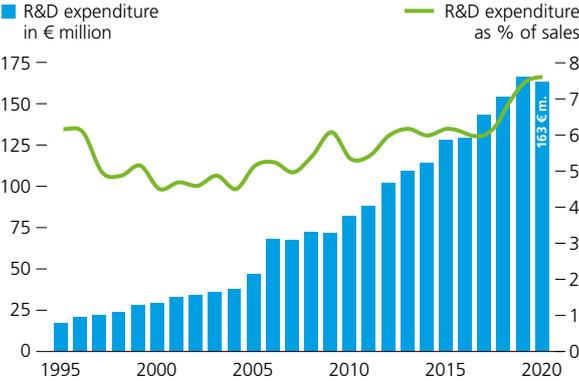

ALTANA employees and sales are evenly distributed among three different regions of the world. Today, approx. 40% of our sales are generated in emerging markets.

Our Investment in the Future

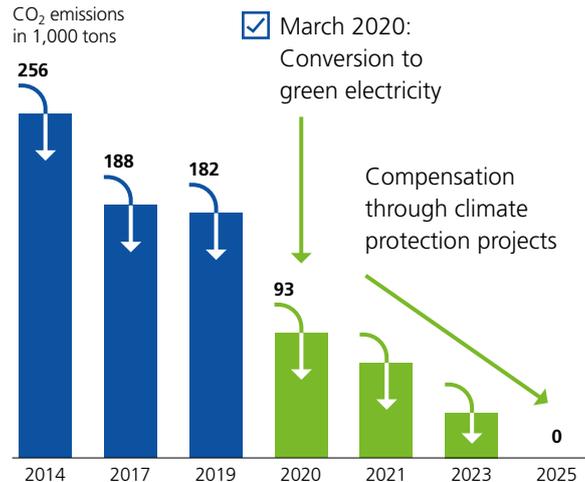

In order to provide added value to our customers, we make above-average investments in research and development:

- About 8% of our sales flow into activities related to research and development.
- The expenses have doubled within the past 10 years.
- One employee in five is employed in research and development.

Our Path to Climate Neutrality

By 2025, we will reduce our CO₂ impact from production and energy procurement to zero worldwide.

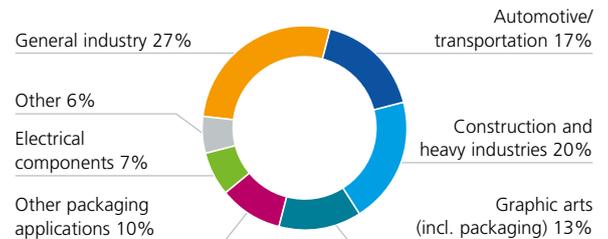

The graph shows the neutralization of CO₂ emissions from production and energy consumption (Scope 1 + 2). In addition, ALTANA will offset the CO₂ emissions caused by necessary business trips, company cars, and the transportation of goods by 2025 (Scope 3).

A Solid Basis for Healthy Growth

ALTANA benefits from a solid positioning for healthy and sustainable growth as well as from a highly diversified focus. Thus, ALTANA is not dependent on

- dominant large customers/large suppliers
- specific markets, products, technologies or applications
- specific sectors of business and industry
- regional economic developments
- raw materials/currency fluctuations

Sales by end-user industries

Our Strategic Focus: 6 Points for Sustainable, Profitable Growth

- 1 Close cooperation with customers through highly specialized products and services
- 2 Innovation driver in growing specialty markets
- 3 Global market leadership positions in growing specialty markets
- 4 Profitable growth under our own steam and through acquisitions
- 5 Focus on sustainability: a combination of ecology, economy and social responsibility
- 6 Highly qualified employees and a corporate culture that fosters innovative strength

ALTANA: Global Leader in Pure Specialty Chemicals

With four independent divisions and employees and locations all over the world ALTANA is

leading in growing specialty markets

flexible and agile – ready to respond quickly to new requirements

focused on highly innovative solutions with significant benefits for customers

broadly based – in terms of geography, technology and market strategy

systematically focused on sustainable, profitable growth

characterized by a corporate culture that is based on fairness and a sense of partnership

ALTANA – Specialty Chemicals Know-How Bundled in Four Divisions

BYK Innovation, Service, and Customer Orientation

The globally successful BYK division encompasses the additives of the BYK Group and the instruments business of BYK-Gardner.

Around the world, the additives of BYK ensure that coatings and plastics obtain the best properties and the right quality. In addition, numerous other industrial applications benefit from the outstanding functional mechanism of BYK additives. Additives are chemical substances that, even when added in small quantities, enhance product properties such as scratch resistance or surface gloss. Manufacturing processes are also optimized through the use of additives.

The coatings, inks and plastics industries are among the main consumers of BYK additives. Yet with exploration activities, the manufacture of care products, the production of adhesives and sealants, and construction chemistry, too, BYK additives improve the product characteristics and production processes.

With testing and measuring instruments from BYK experts effectively evaluate the quality of color, gloss and appearance as well as the physical properties of paint, plastic and paper products. The BYK-Gardner products are an important part of quality control.

Every fifth employee at BYK works in research & development. Approximately 90% of the division's sales is generated outside Germany.

ECKART
Brilliant, Innovative Solutions with Metallic and Pearlescent Effect Pigments

ECKART is a global leader of metallic and pearlescent pigments for the paints and coatings industry, the graphic arts, plastics, aerated concrete and cosmetics industries. The product range encompasses all kinds of pigments and even press-ready metallic printing inks.

This enables ECKART to offer its customers a comprehensive range of effect pigments for every demand. Particular importance is attached to personal service and expert application consulting. Its global presence enables ECKART to identify customer needs and demands at an early stage and to react quickly and flexibly. Intensive research and development activities create special products, innovative solutions, and constant improvements in a wide variety of application areas. Our customers throughout the world particularly appreciate the high quality of our products and the professional standard of our services.

The product range includes aluminium, special pearlescent and PVD pigments, metallic pigment coatings, gold-bronze, iron flakes, stainless steel flakes, and zinc pigments as well as press-ready metallic printing inks. ECKART pigments are widely used, for example, in the automotive industry to achieve metallic effects, but also for other coatings and finishes. The plastics industry uses them, among others, as dye pigments. In the manufacturing of aerated concrete these pigments serve as a propellant.

ELANTAS

Focus on the Global Electrical and Electronics Industry, Global Market Leader in Electrical Insulating Materials

ELANTAS produces insulating materials for the electrical and electronic industry. Those materials can be found in applications such as electric motors, generators, transformers, capacitors, printed circuit boards, power electronics as well as sensors and can be designed to be more reliable, energy efficient and powerful.

Owing to the targeted alignment of research and development projects, continual development of products and processes, and the fact that ELANTAS has production facilities around the world, the division has established a leading international position. Through the focus on customer intimacy, sustainability and safety ELANTAS has become a preferred supplier for the electrical insulation industry and the main partner of large international OEMs.

The division covers the markets through its business lines. The "Wire Enamels" business line offers solutions for various insulation requirements of the magnet wire industry. The mechanical stabilization and secondary insulation of coil windings is the core of the business line "Electrical".

Conformal coatings and encapsulation concepts for electronic components are served through the business line "Electronic". And finally the business line "Engineering Materials" provides adhesives and compounds for predominately composite materials.

ACTEGA

Focus on Packaging

ACTEGA develops, produces and distributes specialty coatings, inks, adhesives and sealing compounds with a focus on the packaging, printing and the medical industry. Following the motto "Packed with Expertise", ACTEGA offers technically sophisticated product solutions, which meet the high safety standards of the food, beverage, pharmaceutical and toy industries. Whether for flexible and metal packaging, folding cartons or labels,

ACTEGA products deliver an attractive appearance to materials such as metal, paper, paper board or plastic, and provide them with defined functionalities, such as high chemical resistance and physical durability.

ACTEGA consists of three business lines, which are specialized in their respective markets.

ACTEGA Flexible Packaging: The portfolio includes packaging solutions for food, beverages, pet food, cosmetics, pharmaceuticals and household products as well as industrial applications.

ACTEGA Metal Packaging Solutions: This includes compounds, sealants, coatings, inks and adhesives for closures, cans, monoblocs and tubes in highly regulated markets such as the food, beverage, pharmaceutical and personal care industries. ACTEGA is the world's leading supplier of sealants for closures and glass containers; it is the technology leader in the area of water-based sealing compounds for cans.

ACTEGA Paper & Board: The business line offers solutions for the packaging and graphic arts industries. This includes paper and board packaging, such as folding cartons and corrugated board, as well as publications and commercial prints. In these markets, ACTEGA holds a leading position in manufacturing water-borne and UV-curable overprint varnishes and effect lacquers.
